	Title	Abstract
1	Pre-defined hardware and software bundle ready for database applications	
2	Database system and methods	
3	Registration of solved cubes within a relational database management system	
4	A System of reusable components for implementing data warehousing and business intelligence solutions	
5	Database server with enhanced management and self-configuration features	
6	Special purpose operating system for executing a database server	
7	Database server designed to read operating system memory without switching context	
8	Techniques for managing configuration for a system of devices arranged in a network	
9	Techniques for managing a database system including one or more database servers	
10	Special purpose operating system for executing a database server	
11	Automated software code generation from a metadata-based repository
